

Traceability

fully automated

OUR MISSION: faster and more reliable diagnostics

Our mission is to provide access to patients for faster and more reliable diagnostics by enabling pathologists with rapid, safe and accurate access to paraffin blocks, slides and patient samples.

Paraffin blocks, slides and patient sample management today is a real issue in any pathology lab. Increasing number of patient samples, blocks and slides and limited resources make archiving, traceability and safety very challenging. Losing patient samples today is a real risk and a concerning potential liability for the laboratory.

Our vision is to become **WORLD LEADER** in
AUTOMATION OF TRACEABILITY
of patient samples in pathology.

FINA (or Arcos)

Is the first fully automated paraffin block management solution in the pathology lab. From sorting to archiving and from retrieving to re-archiving FINA enables pathology professionals with a total paraffin block traceability.

With FINA, sorting, archiving, retrieving and re-archiving blocks today is **FAST, SAFE** and **SIMPLE**

FINA has granted and **PENDING PATENTS** in USA, Europe, Asia and China.

FINA is 100%
ACCURATE
SAFE
SIMPLE
TRACEABILITY
